100ah power station in China in Bolivia

Overview

Does China support hydropower projects in Bolivia?

In line with the push for environmentally friendly Belt and Road Initiative (BRI) infrastructure projects and Bolivia's former President Evo Morales' "2025 Patriotic Agenda" to transform Bolivia into a regional energy hub, China has supported six hydropower energy projects in the country.

How many BRI hydroelectric power projects have been completed in Bolivia?

This article examines evidence of six BRI hydroelectric power projects in Bolivia. Satellite imagery shows that two hydroelectric power plants (HPP), San Jose I and II, have been completed. However, for the other four hydroelectric power projects, construction has not or has barely begun.

Is China financing Hydroelectric power projects in South America?

And of the non-fossil fuel energy projects China is financing in South America, many are hydroelectric power projects, which carry their own environmental consequences. In June 2018, the Chinese and Bolivian governments signed a Memorandum of Understanding (MoU) stating that Bolivia would join the BRI.

Are Bolivia's hydroelectric power projects destroying indigenous peoples?

While the hydroelectric power projects are meant to expand Bolivia's clean energy supply, the projects have had damaging consequences, including the displacement of indigenous peoples and destruction of the wildlife and biodiversity, countering Morales' platform championing indigenous rights.

How many infrastructure projects will China and Bolivia build?

In 2015, China and Bolivia signed an official agreement for China to construct 13 infrastructure projects, including the Chepete-El Bala Complex.

Why is Bolivia a 'energy heart of Latin America'?

Morales envisioned Bolivia becoming the "energy heart of Latin America," and saw hydroelectric power as the means by which to achieve this. This is in part due to the country's geography, home to the elevated Andean mountains and the Amazon rainforest, a landscape that contains a large potential for hydropower production.
