

## SolarInvert Energy Solutions

# 100ah power station in China in Gabon

## Overview

---

How much electricity does Gabon use?

Gabon's total consumption of electricity in 2015 was estimated at 169 ktoe. Though most oil-dependent, in recent years, Gabon has attempted to diversify its energy schedule by including hydropower generation. This is evident in its existing hydropower infrastructure and their plans to create new structures.

Why does Gabon still produce less than its full capacity?

The reasons why Gabon hydropower segment still produces far less than its full capacity are no different from other African countries. Gabon like every other country is plagued with macroeconomic forces like inflation, unemployment, which causes a dirge in economic attention.

How does the topography provide revenue in Gabon?

Though Gabon is famous for its recoverable oil reserves, its topography provides royalties for the country. One way in which the topography provides revenue in Gabon is that 75% - 80% of the land of Gabon constituting forest provides shelter and exportation products through the timbers available at the forest.

Does the uniqueness of the topographic situation present a viable energy solution?

The uniqueness of its topographic situation may present the country with a viable energy solution. © Temiloluwa Bolodeoku. The author warrants that the work is the author's own and that Stanford University provided no input other than typesetting and referencing guidelines.
