

SolarInvert Energy Solutions

16kw sunsynk inverter factory in indonesia

Overview

What is a sunsynk 16 kW inverter?

The SunSynk 16 kW inverter offers a complete single-phase solution and incorporates an inverter, charger and MPPT charge controllers. We have taken the Sunsynk Hybrid Inverter to the highest level. Our new Sunsynk MAX is the most powerful low-voltage inverter in the world, achieving a maximum output power of 16kW and battery charge current of 275A.

How efficient is a sunsynk inverter?

The CT coil measures the power and the inverter will reduce power when too much power is detected going to the grid. Even better, if the Sunsynk inverter only has 2000W of excess solar, the element will receive the other 200W from the grid. So it is efficient.

Can a sunsynk inverter handle a 4 kW load?

Going through the various parts of the HF design, I can also think of reasons why it is likely easier to optimise there and get higher efficiency whereas LF design is somewhat fixed on what it can do. Simple answer is yes, the 5.5 kW or 8.8 kW Sunsynk inverter will easily handle your load (4 kW) without problems for long periods of time.

Will Indonesia's solar market grow at the utility-scale?

IRENA's report predicts that the Indonesian solar market is likely to grow at the utility-scale. This means that residential and commercial photovoltaic systems will substitute traditional power generation. If this report is anything to go by, there are many opportunities for solar installers and professionals in Indonesia.

Will Indonesia's solar market reach 47 gigawatts by 2030?

A recent IRENA report reveals that the Indonesian market can attain a capacity of 47 Gigawatts by 2030. IRENA's report predicts that the Indonesian

solar market is likely to grow at the utility-scale. This means that residential and commercial photovoltaic systems will substitute traditional power generation.

What is a microinverter solar system?

Typically, microinverters are “distributed” inverters. Solar PV systems with microinverters have a small inverter installed for each individual solar panel. Instead of sending energy from every panel to a single inverter, microinverters convert the DC energy to AC energy on the roof itself.

16kw sunsynk inverter factory in indonesia
