192v uninterruptible power supply to 48v

Overview

What is a 12V uninterruptible power supply?

This is a simple and fully automatic, 12V uninterruptible power supply system for small/medium power appliances. This power supply specifically designs to drive routers and modems to provide uninterrupted internet and telephone services in areas affected by frequent power failures.

What is a 48V DC UPS?

The 48v dc ups come loaded with state-of-the-art technologies and innovations to be able to fit in with the ever-changing computer architectures. Thoughts behind the 48v dc ups designs and styles guarantee you the best output, long durability, and aesthetic appearance.

What makes UPSI a good energy storage system?

Due of the used energy storage technologies the UPSI system is characterised by low total cost of ownership (TCO) and high safety and longevity.
