2 75mwh energy storage system in Puerto-Rico

Overview

What is Puerto Rico's battery energy storage system?

The Puerto Rico Electric Power Authority's battery energy storage system is a 20,000kW energy storage project located in Puerto Rico. It was announced in 2018 and will be commissioned in 2020. The Puerto Rico Electric Power Authority owns the system (100%).

Where can I find information about Puerto Rico's energy transformation?

Read the White House Fact Sheet. The Financial Oversight and Management Board for Puerto Rico and the U.S. Department of Energy together created the new website Ruta Energética para Puerto Rico to provide information about Puerto Rico's energy transformation and grid modernization.

What does the Department of energy do in Puerto Rico?

The U.S. Department of Energy (DOE) supports grid recovery and resiliency efforts in Puerto Rico through planning assistance, operational activities, and capacity building for both local public entities and federal agencies, ensuring investment decisions are driven by world-class data, modeling, and analysis.

Where is the Puerto Rico energy project located?

Upon completion, the Project will deliver clean energy to the grid and is anticipated to power the equivalent of more than 80,000 homes, generating approximately 3% of Puerto Rico's energy needs.* Located on State Road PR-03 km 150.5, Guayama, PR 00784. Located north and south of State Road PR-03 km 144.7, Guayama, PR 00784.

Where are Puerto Rico's power plants located?

The facilities will be located in the municipalities of Guayama and Salinas and will help deliver clean, reliable, and affordable power to communities throughout Puerto Rico.

Who is eligible for solar power in Puerto Rico?

DOE also expanded medical eligibility for this program, and now households with a resident over age 65 or under 4 years of age may also qualify for an installation. Residents of Puerto Rico can visit energy.gov/solarPR or call (833) 822-8628 to check their eligibility and apply.
