

## SolarInvert Energy Solutions

# 4V super capacitor

## Overview

---

What is a supercapacitor?

This technology, in its first generation, is called a supercapacitor, interchangeably known as ultracapacitor or EDLC (electrochemical double layer capacitor), The PowerRESPONDER™ product line is a next generation, higher-energy-density, hybrid-supercapacitor.

How many volts can a supercapacitor have?

First generation supercapacitor or EDLC cells have a max 2.7 volts but the hybrid-supercapacitors, offered here as PowerRESPONDER products, can have a max of 4.2 volts.

Where can I buy supercapacitors & ultracapacitor?

Please try again. Supercapacitors & Ultracapacitors are available at Mouser Electronics from industry leading manufacturers. Mouser is an authorized distributor for many supercapacitor and ultracapacitor manufacturers including Cornell Dubilier, Eaton, Elna, KEMET, KYOCERA AVX, Maxwell, Vishay & more.

What is a super capacitor?

For those of you who don't know much about super capacitors, here is a little bit of fun theory: Super capacitors act like any other kind of capacitor, only they can store tremendous amounts of energy. Many capacitors that you'd have seen in audio circuits have capacitances such as 470uf or 680uf (micro farads).

What voltage is a super capacitor rated for?

Super-capacitors in market today are normally rated for 2.5V, 2.7V or 5.5V. Just like a lithium cell these capacitors have to be connected in series and parallel combination to form high voltage battery packs.

Which supercapacitor manufacturers does Mouser sell?

Mouser is an authorized distributor for many supercapacitor and ultracapacitor manufacturers including Cornell Dubilier, Eaton, Elna, KEMET, KYOCERA AVX, Maxwell, Vishay & more. Please view our selection of supercapacitors and ultracapacitors below.
