

SolarInvert Energy Solutions

500W household off-grid solar power generation system

Overview

What is a 500-watt off-grid Solar System?

A 500-watt off-grid Solar System is designed to provide power supply for 4-5 hours to 2-3 BHK homes in India having an unreliable electricity supply. It is like a small power plant with a peak Load capacity of up to 650 Watts. It consists of monocrystalline panels and comes with more than 97% Inverter efficiency and over 16% Module efficiency.

What is a 50kw off-grid Solar System?

In a 50kW off grid solar system, you will get solar panels, off-grid solar inverter, solar batteries and other solar accessories. This system is specially designed to provide long power backups during power outages or nights. Solar panels generate electricity by absorbing the sunlight in the daytime and run your connected load.

What components do I need for an off-grid Solar System?

Below is a combination of multiple calculators that consider these variables and allow you to size the essential components for your off-grid solar system: The solar array. The battery bank. The solar charge controller. The power inverter. Simply follow the steps and instructions provided below.
