

## SolarInvert Energy Solutions

# 600V energy storage lithium battery 150 kWh

CE UN38.3 MSDS

## Overview

---

What is a 50kw-300kw lithium energy storage system?

A 50KW-300KW lithium energy storage system consists of 48-volt modules with capacities ranging from 100Ah to 400Ah. These systems can be paralleled up to 14 units if a larger battery storage system is required.

How many modules are in a 150 kWh battery?

The 150 kWh battery consists of 30 modules of 5kWh lithium iron phosphate battery, or it can be designed to consist of 15 modules of 10kWh, depending on whether you have requirements for the battery voltage, charging and discharging current. The battery cabinet is made of hard metal. Inside, there is a choice between air-cooling and water-cooling.

What are battery management systems & energy relationship systems?

Battery management systems and energy relationship systems are well adapted to various chargers, PV inverters, PCS and other devices. It manages and coordinates the connection of the battery to other devices, the operation of the device, shutting it down and turning it on. Simple operation & flexible capacity extension upon requirements.
