A32 Battery cabinet battery placement

Overview

How to remove battery from Samsung Galaxy A32?

To safely remove the battery from your Samsung Galaxy A32, you will need a few basic tools. A small Phillips screwdriver is essential for unscrewing the back cover. Additionally, a plastic opening tool or a case opening tool can help you gently pry open the back cover without damaging the device.

Does the Samsung Galaxy A32 have a battery?

The Samsung Galaxy A32 is equipped with a non-removable 5000 mAh lithium-ion battery. This battery provides long-lasting power, allowing you to enjoy various features without frequent recharging. However, non-removable does mean that accessing the battery requires some extra steps.

Can I use a third-party battery for my Samsung Galaxy A32?

Using a third-party battery for your Samsung Galaxy A32 is possible, but it comes with risks. Not all third-party batteries are created equal, and you may encounter issues such as reduced battery life, overheating, or even failure to charge.

How to extend the life of a Samsung Galaxy A32 battery?

To extend the life of your Samsung Galaxy A32 battery, consider adopting a few good practices. Avoid exposing your phone to extreme temperatures, both hot and cold, as this can degrade battery performance.

How to remove the back cover of a Samsung Galaxy A32?

To safely remove the back cover of your Samsung Galaxy A32, start by placing a plastic opening tool in the small gap between the back cover and the frame of the phone. Gently twist the tool to create a larger opening, and work your way around the edges to fully release the clips holding the cover in place.

How do you attach a battery to a frame?

Insert an opening pick into the gap between the edge of the battery and the frame. Slide the tip of your opening pick underneath the edge of the battery. Slide the the opening pick along the edge of the battery to slice its adhesive and to widen the gap between battery and frame.
