

## SolarInvert Energy Solutions

# Abu Dhabi container photovoltaic power generation

## Overview

---

The UAE has launched what it says is the world's first and largest 24-hour power project, combining solar photovoltaic with battery storage to deliver 1 gigawatt of baseload electricity. Does Al Dhafra have a solar project in Abu Dhabi?

The Al Dhafra PV2 Solar project in Abu Dhabi – for which ABB supplies automation and optimization power generation solutions – is now exporting 100 percent of its designed capacity onto the grid.

Why should UAE invest in solar power & battery energy storage?

The world-leading project reflects the vision and commitment of the UAE leadership in driving socioeconomic and environmental progress. The accelerated integration of solar power and advanced battery energy storage sets a new benchmark in clean energy, driving sustainability and reducing carbon emissions.

How many solar panels does Al Dhafra use?

Covering an area of 20 square km in the Al Dhafra region, located around 30 km south of Abu Dhabi City, the 2 GW plant uses four million solar modules to generate enough electricity for 200,000 homes across the UAE per year.

What is Sweihan power project?

The Sweihan power project is a 1,177MW solar photovoltaic (PV) independent power project (IPP) in Abu Dhabi, UAE. A financing agreement for the project was signed with a group of banks in May 2017. Credit: Middle East Solar Industry Association. Masdar was in talks with Hero Future Energies for a 20% stake in the company. Credit: First Solar Inc.

Who is the EPC contractor for Sweihan PV power plant?

Sterling and Wilson, a company based in India, was selected by Sweihan Solar as the engineering, procurement and construction (EPC) contractor for the

Sweihan PV power plant in June 2017. The contractual scope also includes the provision of operation and maintenance services.

What is the largest combined solar and battery energy storage system?

Delivering up to 1 gigawatt (GW) of baseload power every day generated from renewable energy, it will be the largest combined solar and battery energy storage system (BESS) in the world.
