

## SolarInvert Energy Solutions

# Albania Photovoltaic Energy Storage Application Products Exhibition

## Overview

---

How many solar projects are there in Albania?

Albania's Ministry of Infrastructure and Energy has received four applications for solar projects with a total installed capacity of 235 MW. The projects are planned to be built in the country's photovoltaic hub Fier region, the largest of which will be the second largest solar facility in Albania.

Will a 100 MW solar power plant be built in Albania?

A company called Euron Solar-PV has submitted an application to the Albanian Ministry of Infrastructure and Energy for the construction of a 100 MW Solar power plant in the villages of Fushe and Povelce, near Fier City. The project is currently in its initial stages and the public has two weeks to submit comments and objections.

Where is Albania's second largest photovoltaic plant?

The company laid the cornerstone late last year for the 100 MW solar power system in the west of Albania. The site is near the port city of Durrës. One other PV plant is planned for expansion to 100 MW. Now another project of the same size is racing for the position of the country's second-largest photovoltaic facility.

Could a photovoltaic unit be the second-biggest in Albania?

A proposed unit in Fier, the country's photovoltaics hub, would be the second-biggest in the country. Solar power accounts for 6% of electricity production in Albania. More than half of the photovoltaic output is from the Karavasta facility, the biggest of its kind in the Western Balkans. It has 140 MW in peak capacity.

Is solar a viable alternative to electricity in Albania?

A move toward more solar is partly an attempt to diversify Albania's electricity sources. In "Evaluation and integration of photovoltaic (PV) systems in

Albanian energy landscape,” which was recently published in Solar Compass, the scientists said that solar is an adaptable and affordable alternative, given Albania’s sunny climate.

Could solar power reduce Albania's reliance on energy imports?

Albanian researchers say that solar could be key to reducing Albania’s reliance on energy imports, but the nation will need to invest in grid infrastructure, streamline laws, and enhance access to funding to support deployment.
