Angola Pool Energy Storage Power Station

Overview

Is Angola part of the southern African Power Pool?

Angola is currently a non-operating member of the Southern African Power Pool, but plans exist to connect to the pool through Namibia (Baynes Dam). An MOU was signed between Namibia and Angola for the joint construction of the Baynes Dam hydroelectric plant with an installed capacity of 600 MW.

Can Angola produce electricity from mini-hydro power stations?

Furthermore, Angola's Ministry of Energy and Water has identified nearly 100 locations to produce up to 600 MW of renewable electricity from mini-hydro power stations – which will each have a capacity of less than 10 MW – throughout the country's vast river network.

How much electricity does Angola generate?

Meanwhile, significantly contributing to Angola's current installed capacity of 5.6 GW, the 750 MW Soyo I combined cycle plant is currently generating 500 MW of electricity. Plans are currently underway to develop a second Soyo combined cycle plant, which will contribute an additional 750 MW to the country's grid.

How can Angola support new production capacity?

For the country to support new production capacity, power transmission infrastructure in Angola will have to be enhanced.

What is the natural gas commercialization law in Angola?

In May 2018, the Government of Angola passed the Natural Gas Commercialization Law, which is poised to encourage the provision and development of energy production equipment for natural gas, thus attracting further private investment to the country.

Who is involved in the FPSO deployment in Angola?

This delegation did not only include members of the Angolan diplomatic entities accredited in China and representatives of the National Agency of Oil, Gas, and Biofuels (ANPG) but also the partners of Block 15/06, where the FPSO is expected to be deployed at the West Hub field offshore Angola.
