Anti-dumping of photovoltaic glass in the Cook Islands

Overview

Are the Cook Islands a good place for solid waste management?

The movement gathered momentum. “Despite the problems, standards for solid waste management and pollution control are noticeably higher in the Cook Islands than in most of the other Pacific developing member countries,” reads a report commissioned in 2014 by the Asian Development Bank.

What is the Cook Islands loss and damage dialogue?

The Cook Islands Loss and Damage Dialogue brings together over 30 participants from Rarotonga, Aitutaki, Atiu, Mangaia and Mitiaro with delegates from the Northern Group Pa Enua participating virtually.

Why do Cook islanders want a glass crusher?

“With tourism comprising such a large proportion of its economy, Cook Islanders want those standards to be even higher.” In 2019, the Cook Islands government set aside funding for an industrial-sized glass crusher to deal with the nearly thousand tonnes of glass ending up in the landfill each year.

How does a waste management system work in the Cook Islands?

It allows for nearly half the weight of the island’s waste to be diverted from the landfill. Jaime Short, who coordinates waste programmes at Infrastructure Cook Islands, credits collaboration between government and the private sector with the progress made in the area of waste management.

When is the 2025 Cook Islands national dialogue on loss and damage?

“It is great to see that this dialogue provides space to share different groups’ needs and experiences when assessing loss and damage, and planning and developing response measures.” The 2025 Cook Islands National Dialogue on Loss and Damage is held from 14 to 16 April 2025 in Rarotonga.

Why is the Cook Islands focusing on a future of self-governance?

Celebrating history with 60-years of self-governance this year, the Cook Islands is also focusing its lens on a future where the challenges of climate-induced loss and damage are met with equitable and effective solutions.
