Apia Energy Storage Lithium Battery Wholesale Price

Overview

What is a lithium ion battery?

Lithium iron phosphate (LFP) and lithium nickel manganese cobalt oxide (NCM) are two types of rechargeable batteries commonly used in electric vehicles and renewable energy storage. with minor processing Historic prices on lithium ion battery cells.

How much does a lithium ion battery cost?

The electric vehicle market, the primary driver for lithium-ion batteries, grew more slowly than in previous years but still showed the lowest price at \$97 per kWh. Meanwhile, the stationary storage market has surged, with intense competition among cell and system suppliers, particularly in China.

How much does a lithium battery cost in 2024?

In 2024, the average global prices of lithium-ion batteries dropped by 20%, reaching \$115 per kWh. For electric vehicle batteries, the price fell below \$100 per kWh Why Are Lithium Battery Prices Falling?

.

How much does a lithium battery cost in China?

Meanwhile, the stationary storage market has surged, with intense competition among cell and system suppliers, particularly in China. Regionally, the average prices of lithium battery packs were lower in China, at \$94 per kWh, while prices in the U.S. and Europe were 31% and 48% higher, respectively.

Why should you trade with Iosco-compliant lithium price data?

Trade with lithium price data that is unbiased, IOSCO-compliant and widely used across the energy commodity markets. Our lithium prices are market-reflective, assessing both the buy- and sell-side of transactions.

Who provides the lithium commodity price?

We provide the lithium commodity price for the following: Fastmarkets' mission is to meet the market's data requirements honestly and independently, acting with integrity and care to ensure that the trust and confidence placed in the reliability of our pricing methodologies is maintained.
