## Overview

---

What are arc flash protection relays used for?

The protection relays are to be used for the power grids supplying the train network in Sweden. The Prunéřov Power Stations are the largest fossil power station complex in the Czech Republic. Arcteq is a pioneer in arc flash protection, and we are known for making the most accurate protection devices in the world.

Who is arc flash protection?

We are an independent, family-owned company with a focus on protection relays and arc flash protection systems. We are an agile companion with reliable delivery times, and all our products are manufactured in our headquarters in Vaasa, Finland.

How many arc flash sensors are there?

Over 50,000 protection devices and 100,000 arc flash sensors are installed in more than 50 countries all over the globe. Sales and support in all continents through our own offices and partners worldwide. One of the fastest-growing companies in the global protection and control business. The average after-sales response time is less than two hours.

Which arc protection systems will be used in Gecamines' new 6.6kV switchgears?

Arcteq has supplied fully selective arc protection systems to Gecamines' new 6.6kV metal-clad switchgears. The protection relays are to be used for the power grids supplying the train network in Sweden. The Prunéřov Power Stations are the largest fossil power station complex in the Czech Republic.

How many arc protection relays does CERN have?

Arcteq Relays supplies CERN with nearly 250 protection relays to protect and control the electrical grid and power supply. Arcteq has supplied fully selective

arc protection systems to Gecamines' new 6.6kV metal-clad switchgears. The protection relays are to be used for the power grids supplying the train network in Sweden.

What is arc flash mitigation?

Innovative arc flash mitigation in less than 4 ms: the highest possible level of arc flash protection for personnel and equipment, maintenance of secure power supply and the reduction of production stoppages.
