

## SolarInvert Energy Solutions

# Athens double-sided solar panels

## Overview

---

In April 2022, the Greek Prime Minister Kyriakos Mitsotakis inaugurated an enormous two-sided 204-megawatt solar park—the biggest system in all of Europe. How much does a solar farm cost in Greece?

Prime Minister Kyriakos Mitsotakis officially opened the €130 million (\$141.7 million) solar farm, which is expected to generate 350 GWh of electricity capable of powering 75,000 homes annually. It has 500,000 bifacial panels and will be connected to Greece's power grid in the next couple of weeks.

How many bifacial panels does Kozani solar farm have?

It has 500,000 bifacial panels and will be connected to Greece's power grid in the next couple of weeks. German renewables developer Juwi, through its subsidiary Juwi Hellas, is the original developer of the Kozani solar farm. Juwi sold the solar farm to Hellenic Petroleum, Greece's biggest oil refiner, in 2020.

What is a bifacial solar panel?

Bifacial, or double-sided, solar panels collect light on both sides. They can produce one-third more energy than monofacial solar panels. They are slim and need special racking in order to gain maximum exposure to the sun.
