Auckland New Zealand is suitable for solar water pumps

Overview

Can a Lorentz solar pump help a New Zealand farm?

Remote water sources will never again be a problem for New Zealand farms. With a Lorentz solar pump, you can draw water from anywhere and any source, or work with an irrigation system you already have and operate. With efficient water supply and management in place, good land is used to its full capacity.

What are the best water pumps NZ has to offer?

The best water pumps NZ has to offer makes use of solar power systems. Increase the supply of water and benefit from the abundance of clean, alternative energy with Lorentz pumps. If you have an excellent water source within your farm that's beyond the reach of any power source, it might well be worth a look.

Can a solar water pump be used on a farm?

As long as you have a water source, you can pump it. Get the perfect solar powered water pump system for your NZ farm needs by having it custom-designed. Optimise functionality with a solution specifically built around your requirements. Able Solar offers solar panel installations for farms throughout New Zealand.

What is a solar-powered water pumping system?

Each solar-powered water pumping system is made up of a Lorentz pump end, brushless, 3ph pump motor and a controller. This modular concept keeps all the electronics above ground providing ease of access for simple servicing which in turn makes these very economical to own.

Are Grundfos solar-powered pumps suitable for remote water supply in New Zealand?

IRRIGATION | PUMPING | FILTRATION | WATER TREATMENT Grundfos solar-

powered pumps are suitable for remote water supply, off-grid living, stock watering, and irrigation in New Zealand.

Why should you choose epump solar powered water pump?

This makes solar water pump more energy-efficient and environmentally friendly, unlike traditional pumps that heavily rely on grid electricity or fuel. Our ePumP solar powered water pump depends on sunlight intensity and is more suitable for sunny regions.
