

SolarInvert Energy Solutions

BESS energy storage cabinet container in Manchester UK

Overview

What is a Bess container?

The Eldapoint Group BESS containers range is custom-designed to provide highly efficient housings for renewables. Built to satisfy the most demanding environments and LPCB requirements, we specialise in Lithium-ion battery enclosures. Our BESS range offers three sizes to cater to diverse requirements.

Who are Bess project delivery services?

We provide complete project delivery services for BESS schemes across the UK, aligned with the technical, regulatory and programme requirements of today's energy sector. We're experienced contractors delivering battery energy storage systems (BESS) for some of the largest energy organisations in the UK.

Could a £750m battery energy storage scheme be the world's largest?

Planning permission has been granted for a £750m battery energy storage scheme (BESS) near Manchester. Carlton Power, the independent energy-infrastructure developer behind the venture, said the 1GW facility at the Trafford Low Carbon Energy Park would be the world's largest battery-storage facility.

What is a Bess unit & why is it important?

BESS units play a crucial role in global carbon reduction. The UK has the largest installed offshore wind capacity in the world. It's the strategic implementation of BESS units that allows utilities to capture, store, and deploy this clean energy efficiently.

Why should you choose a Bess enclosure?

Our BESS enclosures offer modularity and scalability to accommodate evolving energy storage needs. Their modular design allows for easy

expansion or reconfiguration. Additional battery units and upgrades can be seamlessly integrated without significant structural modifications.

What is Bess & how does it work?

When combined with on-site wind or solar power plants, BESS maximize the value of electricity produced from renewable sources, helping to reduce energy costs at the wholesale level and reflecting these savings on electricity bills.
