## Overview

---

Are battery energy storage systems becoming a reality in Malaysia?

The utilities sector in Malaysia is witnessing significant advancements in battery energy storage systems (BESS), evolving from concept to reality with notable projects underway. The first large-scale BESS project is currently being constructed in Sabah, a pivotal development for the country's energy landscape.

Are battery energy storage systems a good investment?

Battery energy storage systems (BESS) are revolutionising the green energy industry with their potential to harness and utilise renewable energy sources more efficiently. BESS offers not only environmental benefits but also lucrative investment opportunities.

Can Malaysia emerge as a key player in the Bess industry?

With supportive policies and rich renewable resources, Malaysia can emerge as a significant player in the BESS industry. A central pillar of MyRER's post-2025 strategy involves prioritising cost-effective energy storage solutions, including battery storage.

Should Malaysia adopt solar power?

Solar is also the cheapest source of electricity in many countries. As such, the government has become more proactive in determining areas suited for solar power adoption, notably battery energy storage systems in Malaysia.

Could a solar project with battery storage double the tariffs imposed?

It is estimated that a solar project with battery storage could double the tariffs imposed by the project developer to ensure the project is financially viable.

Is Tenaga Nasional Berhad planning a 400MWh Bess project?

Companies associated with this emerging market include Tenaga Nasional Berhad (TNB, HOLD, CP: RM14.46, TP: RM14.00), which previously announced a potential development of a 400MWh BESS project in early 2024. However, no updates have been provided, suggesting that the project may still be in the feasibility assessment phase.
