

## SolarInvert Energy Solutions

# Bangkok multifunctional outdoor power supply BESS

## Overview

---

What is Delta Battery energy storage system (BESS)?

Delta's lithium battery energy storage system (BESS) is a complete system design with features like high energy density, battery management, multi-level safety protection, an outdoor cabinet with a modular design. Furthermore, it meets international standards used in Europe, America, and Japan. [Read more.](#)

Can Bess create business opportunities in Thailand?

Watcharin Boonyarit, director of solar energy development at the Department of Alternative Energy Development and Efficiency, noted the potential for BESS to create business opportunities as Thailand transitions to renewable power sources. "We should not only import BESS but also consider new investment projects in this battery business."

What is Sungrow's PV plus Bess project?

Sungrow will supply the comprehensive PV plus BESS solution, comprising of 49.01 MW PV inverter solutions and 45 MW/136.24 MWh battery energy storage system. This project is planned to start in April 2022, and will be commercial in December.

Will Bess be more popular than Ev batteries?

BESS may currently be less popular than EV batteries, but demand is expected to rise significantly in the next three to four years as households increasingly rely on renewable energy, reported Bangkok Post. Thailand's 2024 plan increases renewable energy, highlighting crucial battery storage systems for buildings and power generation.

What does Bess mean for Thailand?

"BESS plays a key role in supporting the continual supply of electricity and will be essential for state efforts to achieve carbon neutrality." Thailand is

committed to reducing carbon dioxide emissions, with the government aiming for carbon neutrality by 2050, as announced at the 2021 UN Climate Change Conference in Glasgow.

What is Bess & why is it important?

Renewable sources like solar and wind power are intermittent, and influenced by weather patterns. BESS mitigates this issue by storing electricity for future use. Thailand's 2024 power development plan (PDP) aims to increase renewable energy use, highlighting the importance of BESS alongside solar panels and wind turbines.
