

## SolarInvert Energy Solutions

# Base station communication equipment OLT motherboard

## Overview

---

What is a communication base station?

Communication base stations are an essential element in providing a stable communication environment for mobile communication devices such as mobile phones and smartphones. The installation of 5G base stations and compact base stations (small cells) in areas where signals are congested is presently proceeding apace.

What is DBS3900 dual-mode base station?

DBS3900 Dual-Mode Base Station is the fourth generation base station developed by Huawei. It features a multi-mode modular design and supports three working modes: GSM mode, GSM+UMTS dual mode, and UMTS mode through configuration of different software. In addition, the DBS3900 supports smooth evolution to the Long-Term Evolution (LTE).

What is a 5G base station & a compact base station?

The installation of 5G base stations and compact base stations (small cells) in areas where signals are congested is presently proceeding apace. Murata offers products that support high-speed, high-capacity communication, such as compact, low-loss capacitors and inductors, and high-frequency filters.

What is a baseband unit (BBU)?

The baseband unit (BBU) is a crucial component in mobile base stations, handling tasks like signal processing, resource allocation, and protocol management to ensure efficient communication between mobile devices and networks. It also ensures security through encryption and manages interference and network operations.

What is base station Native AI?

With base station native AI in the BBU, it supports the Radio Composer and PowerPilot solutions to realize optimized user experience and network

efficiency and reduced base station power consumption.

How many working modes does the dbs3900 support?

Based on the unified hardware platform, the DBS3900 supports three working modes: GSM mode, GSM+UMTS dual mode, and UMTS mode through configuration of different software. In addition, the DBS3900 supports smooth evolution to the Long-Term Evolution (LTE).
