# **Base station electricity** introduction fee

#### **Overview**

What is a base charge for electricity?

A base charge for electricity is a flat fee included in your electricity costs charged by your retail electricity provider (REP), and is applied to each billing cycle regardless of how much electricity you use. This fee covers essential administrative costs associated with maintaining your account and ensuring that customer support is accessible.

How much does base cost?

The membership fee is \$225/year or \$345/year billed annually depending on your plan. For your monthly energy bills, our energy rate is 9c/kWh plus your utility's transmission and delivery fees. If you have solar, Base buys back any excess energy you produce at a rate of 3¢/kWh + a real-time wholesale rate bonus.

What is base power?

Base Power doesn't just provide reliable power for individual homes—Base is redefining how energy storage systems can support the entire power grid. How much does Base cost?

How much will I pay for energy?

To get with Base, you pay a \$50 refundable deposit upfront.

What is base's energy rate?

For your monthly energy bills, our energy rate is 9c/kWh plus your utility's transmission and delivery fees. If you have solar, Base buys back any excess energy you produce at a rate of 3¢/kWh + a real-time wholesale rate bonus. You can see Base's latest plans and Electricity Facts Labels (EFLs) here.

How much does a base charge cost?

Consider this scenario: if your base charge is \$20 and your usage charges amount to \$30, the total comes to \$50. This means that the base charge accounts for a significant 40% of the total bill. Especially for those who consume less electricity, the base charge can form a major portion of monthly expenses.

Do electricity plans have a base charge?

Electricity plans without base charges typically compensate with higher rates for electricity usage. This arrangement might favor high-electricity consumers, potentially lowering their overall costs by offsetting the lack of a base charge with the volume of electricity used.
