

## SolarInvert Energy Solutions

# Battery energy storage project construction in the Netherlands

## Overview

---

A 100 MW / 200 MWh battery energy storage system in Waddinxveen, capable to power 50% of the city of The Hague, is set to go live mid 2026 and has a critical role in stabilizing the Dutch grid and accelerating the transition to renewable energy. Is RWE building a battery energy storage system in the Netherlands?

RWE, Europe's utility giant, announced last week it has commenced the construction of its maiden battery energy storage system (BESS). This project will be occur in the Netherlands. Amid a frantic race across Europe to expand renewables and exit fossil fuel plants. It is located at RWE's Eemshaven multi-technology hub.

Is the Netherlands battery energy storage construction a good idea?

The Netherlands battery energy storage construction may be the first step for rivals to reproduce the experience, while competencies will be the added value for the Infrastructure of RWE power plants as well as for the Europe-wide generation sector. When it comes to size, this installation definitely is not big.

Where can batteries connect to the transmission system in the Netherlands?

Many substations where batteries could connect to the transmission system in the Netherlands are often in rural areas. Developer Dispatch has begun construction on a 45MW/90MWh battery storage project in the Netherlands, with Macquarie among its backers.

How much does a 100 mw/200 MWh battery energy storage project cost?

Energy storage provider Return has broken ground on a 100-MW/200-MWh battery energy storage project in the western part of the Netherlands, the cost of which is estimated at EUR 85 million (USD 97m). Visualisation of the Antares BESS project in Waddinxveen, Netherlands. Image source: Return.

How will Vattenfall manage a battery energy storage system?

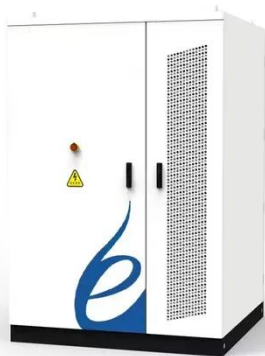

Vattenfall will manage and optimize half of the system's capacity under an eight-year contract. Return has launched construction works on the 100 MW / 200 MWh Antares battery energy storage system (BESS) in Waddinxveen, in the western Netherlands. The project is set to go live mid 2026 and play a critical role in stabilizing the Dutch grid.

What is a fast battery energy storage system (BESS)?

Credit: RWE. RWE has commenced construction of an ultra-fast battery energy storage system (BESS) at its Moerdijk power plant in the Netherlands. The system, designed with an installed capacity of 7.5MW and a storage capacity of 11 megawatt hours (MWh), aims to enhance grid stability by providing or absorbing electricity within milliseconds.
