

SolarInvert Energy Solutions

Belgium Antwerp home energy storage 100 degrees EK

Overview

What is the largest energy storage project in Europe?

A first flagship energy storage project in Belgium After commissioning four battery parks in France offering total energy storage capacity of 130 MWh, this project will be the Company's largest battery installation in Europe.

Why is totalenergies launching a battery energy storage system in Belgium?

This project, located on the Antwerp refinery site, will benefit from the available land and the site's grid connection. It is a new step in TotalEnergies' development of battery energy storage systems (BESS) which strengthens the company's presence across the entire electricity value chain in Belgium (production, storage, supply).

When will totalenergies start-up in Belgium?

Start-up is expected at the end of 2025. These two projects, which represent a global investment of nearly €70 million, will bring TotalEnergies' storage capacity in Belgium to 50 MW / 150 MWh. These battery storage sites play a key role in the resilience of the electricity system, providing flexibility and helping solve grid congestion problems.

What is the largest battery installation in Europe?

After commissioning four battery parks in France offering total energy storage capacity of 130 MWh, this project will be the Company's largest battery installation in Europe.

Does Belgium have a solar power system?

In Belgium, the share of renewable electricity in the country's overall electricity production has risen steadily in recent years. To avoid the risk of blackouts, large-scale storage facilities associated with solar photovoltaic projects are on the increase.

Who is totalenergies in Belgium?

In Belgium, TotalEnergies is a major player in the entire electricity value chain. As an electricity supplier, the company has a portfolio of 450,000 BtC sites and around 100,000 BtB sites.
