

SolarInvert Energy Solutions

Belgrade outdoor power lithium battery factory

Overview

Could Serbia be a technological leader in LFP battery production?

The Republic of Serbia could be a technological leader in LFP battery production in the whole world outside of China, because it has a chance to become the first in Europe to mass-produce this type of battery. The signed Memorandum with the European Union envisages a serious focus on the ecosystem of electric vehicles and battery production.

Will Serbia and Kosovo support a power plant in the Western Balkans?

The chambers of commerce of Serbia and Kosovo* used the occasion to vow to help the development of the Western Balkans in the economic, social and political sphere and announced a joint group would support plans for a power plant in the region that would install an energy storage facility.

Can Serbia become the energy power of the world?

Serbia has a chance to become the energy power of the world in a few years. If we were to form an entire production chain in Serbia, it would certainly open up space for numerous investments in our country. The economic and market potential of this type of business model and supply chain in Serbia is enormous.
