

## SolarInvert Energy Solutions

# Bess battery storage in China in Vietnam

## Overview

---

Why is Bess important in Vietnam's energy transition?

**Regulatory Landscape** The Vietnamese government has recognized the importance of BESS in the country's energy transition. The revised National Energy Policy includes new incentives for BESS installations, such as tax credits and subsidies, which are aimed at accelerating the adoption of energy storage solutions.

How much does a Bess system cost in Vietnam?

In 2023, EVN PECC3 estimated that the cost for a 2 MWh BESS system was 360–420 USD/kWh, and that the investment would requires electricity prices in Vietnam above 18 UScent/kWh to be profitable – this is twice the current levels. However, BESS costs are declining rapidly.

What is Bess & how can it help Vietnam?

**Energy Management:** BESS can help manage the intermittency of renewable energy sources, ensuring a balanced and stable supply of electricity. Vietnam has 20.1 GW of solar and wind power, and congestion in the electricity transmission grid sometimes lead to waste of electricity.

What is the current state of Bess in Vietnam?

**The Current State of BESS in Vietnam** As of 2024, Vietnam has practically no BESS installed. So far, only private renewable power projects have trialed BESS development, there is nothing at the utility scale. The largest electricity storage project in Vietnam is the Bac Ai Pumped Storage Hydropower Project.

Will Vietnam develop 300 MW of Bess by 2030?

Vietnam's current goal of developing only 300 MW of BESS by 2030 appears modest, but the figure does not include systems coupled to rooftop solar systems. To foster a resilient, efficient, and sustainable energy future, Vietnam should aim high.

What is the largest electricity storage project in Vietnam?

The largest electricity storage project in Vietnam is the Bac Ai Pumped Storage Hydropower Project. Located in Ninh Thuan province, the project has a capacity of 1,200 MW and is expected to play a crucial role in stabilizing the grid when it completes in a few years.

## Bess battery storage in China in Vietnam
