Bess system for solar factory in Mumbai

Overview

How a 100 mw Bess will be installed in Mumbai?

100 MW BESS will be installed across 10 strategic locations in Mumbai over the next two years - Will ensure uninterrupted power supply to critical infrastructure such as the Metro, Hospitals, Airport, and Data Centers during grid disturbances, and will support grid through islanding to prevent blackouts.

Will Tata Power install a 100 MW battery energy storage system in Mumbai?

Mumbai, 7th April, 2025 – Tata Power, India's largest integrated power company and a trusted electricity provider to approx. 8 lakh residential and commercial consumers, has received approval from the Maharashtra Electricity Regulatory Commission (MERC) to install a 100 MW Battery Energy Storage System (BESS) in Mumbai over the next two years.

How will Bess support Mumbai's energy sustainability goals?

The system will have high round-trip efficiency with reduced auxiliary consumption, thereby enhancing operational performance and extending the storage system's lifespan to support Mumbai's energy sustainability goals. As renewable energy adoption accelerates, BESS plays a pivotal role in enabling a smoother transition.

What are the benefits of Bess in Mumbai?

The BESS will offer ancillary services such as frequency regulation and voltage support, enhancing the stability of Mumbai's grid. It will also bolster the integration of renewable energy sources by storing surplus solar power generated during the day and redistributing it during peak demand, thus promoting greater consumption of green energy.

How will Tata Power's Bess deployment fulfil energy storage obligations?

Additionally, Tata Power's BESS deployment will also fulfil energy storage

Obligations. The entire 100 MW system will be installed across 10 strategically located sites, especially near load centres across Mumbai Distribution, centrally monitored and controlled from Tata Power's Power System Control Center (PSCC).

Why is Tata Power launching a Bess?

By efficiently managing load fluctuations, Tata Power also aims to defer major capital expenditure on infrastructure upgrades. The BESS will offer ancillary services such as frequency regulation and voltage support, enhancing the stability of Mumbai's grid.
