

SolarInvert Energy Solutions

Budapest companies that make energy storage batteries

TAX FREE

Product Model

HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions

1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity

215KWH/115KWH

Battery Cooling Method

Air Cooled/Liquid Cooled

Overview

Will Hungary's new battery energy storage system help Green the grid?

The new facility supports a growing push to green Hungary's power grid. Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up its role in Central Europe's growing grid-scale energy transition.

Who makes EV batteries in Hungary?

The only exception is BYD, which operates (among others) a bus assembly plant in Hungary and uses its own batteries. In below, we provide a slight overview about the EV battery producer companies which already operate manufacturing plants in Hungary or announced to do so in the near future.

Should Hungary invest in EV battery plants?

Within the European Union, Hungary puts a particularly high stake on EV battery plants, in the hope that it will find itself among the leading countries of an emerging industry within a few years. Commitment to green mobility is not the only motivation for attracting large battery manufacturers to the small Central European country.

Is Hungary stocking up on battery backup?

Hungary isn't alone in stocking up on battery backup as it charts its green energy path. In neighbouring Bulgaria, a massive 124 MW/496 MWh battery energy storage system went live in Lovech earlier this year.

Which Chinese EV battery companies are launching a European production plant in Debrecen?

In May 2023, another major battery industry investment was officially announced on the Hungarian media: EVE Power, another powerful Chinese participant of the EV battery industry, will establish its first European production plant in Debrecen.

Why are EV traction batteries made in Hungary?

Over the last years, many of the leader EV traction battery manufacturers and their suppliers chose Hungary as the location of their newly established manufacturing plants. This is in line with the goal of the Hungarian government to become one of the main battery producer countries not only in Europe, but also at global level.
