

## SolarInvert Energy Solutions

# Bulgaria monocrystalline solar photovoltaic module export tariffs

### LIQUID COOLING ENERGY STORAGE SYSTEM

**EMS** real-time monitoring

No container design  
flexible site layout

Cycle Life  
**≥ 8000**

Nominal Energy  
**200kwh**

IP Grade  
**IP55**

## Overview

---

How are solar PV projects promoted in Bulgaria?

Large-scale, commercial and industrial PV projects in Bulgaria are promoted through premium agreements. All solar PV plants with capacity of 4 MW and higher can apply for them. Premium agreements are concluded with the Energy Security System Fund (ESSF). RES producers also sign contracts with the National Electricity Company (NEK).

Why is the market for distributed solar PV growing in Bulgaria?

As a result, the market for distributed solar PV in Bulgaria is starting to grow. Remarkably, the growth of the market is occurring despite the lack of a clear policy and regulatory framework, and in spite of the presence of many administrative and tax-related barriers.

How much electricity did Bulgaria import in 2022?

Bulgaria exported 11,639 gigawatt hours but imported 1,154 gigawatt hours of electricity in 2022. The National Recovery and Resilience Plan (‘ NRRP ’) of Bulgaria aims to decommission thermal capacity and invest in renewables, targeting 30,33% renewable energy by 2030.

What is the biggest solar PV plant to be built in Bulgaria?

This is also one of the biggest solar PV plants to be constructed in Bulgaria in recent years. With the solar PV plant, Aurubis Bulgaria will save some 11.700 MWh per year from grid electricity consumption (sufficient for approx. 12.000 households), which will cover an average of 2.5% of the electricity needs of its smelter facility.

What should Bulgaria do about solar energy?

The authorities in Bulgaria need to take steps to systematically reduce barriers, fees, and surcharges on small and medium-sized solar PV systems, make it easier to connect to the grid and export the surplus electricity, and

create a comprehensive policy and regulatory environment to catalyse investments.

Who can apply for a solar PV premium?

All solar PV plants with capacity of 4 MW and higher can apply for them. Premium agreements are concluded with the Energy Security System Fund (ESSF). RES producers also sign contracts with the National Electricity Company (NEK). Premiums are designed to offset the difference in the price in these contracts with the stock price.
