

SolarInvert Energy Solutions

Camping power station factory in Brunei

Overview

How does Brunei produce electricity?

Brunei's power stations primarily produce electricity through natural gas and oil sources, with a small-scale renewable energy project pipeline. The country's electricity sector is overseen by the Department of Electrical Services (DES) and has a total installed capacity of 1,054 MW, serving a small population of approximately 460,000.

How many power plants are there in Brunei?

These five power plants provide about 58% of the country's electrical needs, mainly serving residential areas. The Brunei National Energy Company (BNEC) is the state-owned utility company that operates and manages the electricity supply network in the country.

Does Brunei have solar energy?

In addition to solar energy, Brunei has also explored other renewable energy sources. The country has set a target of increasing the share of renewable energy in its energy mix to 30% by 2035, focusing primarily on solar energy due to its abundance.

Who regulates the electricity sector in Brunei?

The electricity sector in Brunei is regulated by the Department of Electrical Services (DES) under the Ministry of Energy. The DES is responsible for the generation, transmission, distribution, and sales of electricity in the country.

How important is natural gas in Brunei?

In 2010, natural gas accounted for 99% of Brunei's electricity generation, a significant proportion that highlights its importance in the country's energy mix. This trend has continued, with natural gas supplying 75.6% of the nation's total energy needs in 2005.

What is the Tenaga Suria photovoltaic power plant?

This facility, known as the Tenaga Suria Brunei photovoltaic power plant, powers approximately 200 homes and helps determine the optimal PV panel for the country's climatic conditions. The Department of Electrical Services assumed control of the facility in 2013 and is responsible for its daily maintenance and operation.
