Can energy storage cabinets be installed in Ottawa

Overview

Who owns energy supply in Ontario?

While the Province of Ontario is the regulator and owner of electricity generation supplies, municipalities have siting authority over new proposed renewable energy generation and storage projects, such as BESS. The approved amendments set policy direction for siting BESS within Ottawa's rural and urban areas.

Where are battery energy storage systems being built?

BESSes are already approved or under construction in Jarvis, Napanee and Spencerville. In Ottawa, a 150-megawatt battery-storage project for Trail Road has received municipal approval, but a 250-megawatt project by Evolugen for Fitzroy Harbour is facing pushback from some community members. Why Battery Energy Storage Systems?

.

What is the largest energy storage procurement in Canada?

This represented the largest energy storage procurement ever in Canada. A report was tabled at the November 30, 2023 Agricultural and Rural Affairs Committee on four proposed BESS projects within Ottawa, one of which project received Council support, known as a Municipal Support Resolution (MSR).

Will increased storage capacity improve reliability of electricity distribution?

Increased storage capacity will improve the reliability of electricity distribution both locally and throughout the province. BESSes are already approved or under construction in Jarvis, Napanee and Spencerville.

What are battery energy storage systems?

Battery Energy Storage Systems are a critical component of the transition to a

clean, renewable-energy economy that will lower greenhouse gas emissions and help reduce the impacts of climate change. One challenge with wind and solar is that energy can only be produced when the wind is blowing or the sun is shining.
