# Can home solar lights be turned on

## Overview

---

Most solar lights have an on/off switch on the bottom or back of the unit. To turn the light on, you'll need to remove the protective cover and flip the switch to the "on" position. Should a solar light switch be on or off?

If you've got a solar light with an on/off switch, your switch needs to be ON while in use. When storing, not using, or preserving battery life, you can turn your solar light switch to OFF. If you aren't totally sure when your solar light switch should be on or off, or if you want some more specifics on solar lights, you're in the right place.

Do solar lights turn on and off automatically?

Solar lights have an on/off switch, so you can manually turn them on and off when needed. Solar lights turn on and off automatically with the help of a light sensor, but you might be in a case where you need to turn it on during the day or turn it off during the night if you are traveling for a long period.

How do you turn on a solar light?

Find the on/off switch on your solar light. It's most commonly located on the underside of the light, on or near the solar panel. Turn the switch to the "on" position to turn the light on. If it's dark out the light will automatically turn on. If it's day daytime you'll need to cover the sensor to for the light to illuminate.

Do outdoor solar lights have an ON/OFF switch?

Outdoor solar lights come with an on/off switch so you can control when you want your solar light to turn on. If you want the outdoor solar light to continue to work all day every day, you can simply leave the on/off switch in the on position.

How do I use the ON/OFF switch on a solar light?

But just to be sure, I'll explain how to use the on/off switch on a solar light: Find the on/off switch on your solar light. It's most commonly located on the

underside of the light, on or near the solar panel. Turn the switch to the “on” position to turn the light on. If its dark out the light will automatically turn on.

Do solar lights have a power switch?

Solar lights turn on and off automatically with the help of a light sensor, but you might be in a case where you need to turn it on during the day or turn it off during the night if you are traveling for a long period. However, you should know that not all solar lights include a power switch.
