Overview

How much does it cost to install solar power in Canberra?

Currently, over 15% of people in Canberra have switched to solar power. With this trend continuing, solar energy is fast becoming a preferred source of electricity for Aussies. The cost to install solar power in Australia differs slightly depending on the state you live in. Installing a 6kW solar system in Canberra would cost about \$7,387.

How much power does a solar system produce in Canberra?

The power output of your solar system will depend on several factors, including: The average Canberra rooftop receives about 8 hours of sunshine per day. This makes it an excellent climate for solar power installation. So, a good quality 5kW solar system, which is suitable for a three-bedroom house, for example, will produce about 21.5kWh per day.

What size solar system should I install in Canberra?

The average Australian living in Canberra uses about 15 to 25kWh per day. So, a 5kW or 6.6kW solar system would be an ideal size for people looking to lower their electricity bills. Before installing solar panels, your solar installer should help you choose a system size that will meet your home or business needs.

Is solar power worth it in Canberra?

Yes, solar power is worth it in Canberra. The city is fairly sunny throughout the year, and if you consume most or all the power your system generates, you can get a good ROI from the system. The amount your solar system can save you depends on the system size and the percentage of power you can consume daily.

Should you install solar panels first in Canberra?

Many solar panels Canberra customers are installing solar panels first to lower

power bills and keeping their options open to add a battery once prices come down (we expect they will over the next few years).
