

SolarInvert Energy Solutions

Canberra Energy Storage Battery Wholesale Manufacturer

Overview

What is the Big Canberra battery project?

In exchange, the Territory will provide Eku Energy with fixed quarterly payments over a period of 15 years. The Big Canberra Battery project is delivering an ecosystem of batteries at different scales. More information about the Big Canberra Battery is available on the Everyday Climate Choices website.

What does the Big Canberra battery mean for Eku energy?

The Big Canberra Battery represents a significant milestone for Eku Energy as we celebrate our first GWh of battery energy storage in delivery in Australia. This brings our global portfolio of battery energy storage assets to over 4GWh.

Will Canberra's energy supply be future-proofed?

The ACT Government is future-proofing Canberra's energy supply by expanding its renewable energy storage with a new partnership with global specialist energy storage business, Eku Energy, launched by Macquarie's Green Investment Group.

Why should you choose a gel battery manufacturer in Australia?

For over 30 years, we've proudly designed, developed, and delivered premier energy storage solutions to exceed the needs of today and into the future. As the only industrial gel battery manufacturer in Australia, we provide sustainable and reliable power solutions across a range of industries and suited to all environmental conditions.

How much does a battery energy storage system cost?

This 250-megawatt (MW), 500 megawatt-hour (MWh) battery energy storage system (BESS) is part of the Big Canberra Battery project and can store enough renewable energy to power one-third of Canberra for two hours during

peak demand periods. The BESS will cost between \$300 and \$400 million and will be developed, built, and operated by Eku Energy.

What is the Act battery project?

We successfully connected the world's first battery storage facility to the grid, a historic milestone for GPG in the renewables business. The ACT Battery project in Australia will enhance the quality of supply in the city of Canberra and accelerate the country's energy transition by enabling greater introduction of renewable energy into the grid.
