Canberra pull rod outdoor power supply BESS

Overview

What is the act doing to secure Canberra's energy supply?

Generic artist impression of a utility scale battery project. The ACT Government is further securing Canberra's energy supply with a new long-term partnership with Macquarie's Green Investment Group global specialist energy storage team, Eku Energy.

What is the Big Canberra battery project?

The Big Canberra Battery project is delivering an ecosystem of batteries at different scales. More information about the Big Canberra Battery is available on the Everyday Climate Choices website. More information on Eku Energy is available on the Eku Energy website.

Do Bess products need an external power supply?

Most BESS products on the market require an external power supply circuit for their auxiliary loads, although some have built-in circuits and do not need an external supply.

What auxiliary loads are needed for a Bess project?

Fire safety systems, such as fire alarms, control panels and gas ventilation systems (if present). These auxiliary loads are essential for ensuring the safe and efficient operation of BESS projects. Therefore, providing a reliable power supply for these auxiliary loads is crucial.

Do I need backup power for a Bess auxiliary load?

For certain projects, backup power must be provided for the BESS auxiliary load as required by the BESS supplier or fire codes. Some BESS suppliers mandate uninterrupted power to maintain the operation of thermal management systems, ensuring battery temperatures remain within desired limits to minimize degradation.

Does Bess require uninterrupted power?

Some BESS suppliers mandate uninterrupted power to maintain the operation of thermal management systems, ensuring battery temperatures remain within desired limits to minimize degradation. BESS fire safety standards, such as NFPA 855, outline minimum requirements for backup power for fire safety systems.
