Cape Town Energy Storage Systems

Overview

Will Cape Town release an RFP for 100MW battery energy storage?

The City of Cape Town will, in the third quarter of this year, release an RFP for 100MW of battery energy storage systems in an effort to bolster energy security.

What does energy security mean for Cape Town?

2050: Energy Security for a prosperous Cape Town. This vision is underpinned by four principles that describe the kind of energy system Cape Town needs – a resilient energy system that can provide reliable, affordable and carbon-neutral energy to everyone in the face of key shifts and stresses to be navigated, among a range of critical predictables.

How does Cape Town support decarbonisation of electricity?

ties and the City of Cape Town's Energy Strategy
THE KEY AREAS OF ALIGNMENT INCLUDE: Decarbonisation of electricity is evidenced through the City of Cape Town's delivery and support of new renewable energy sources (whether owned or procured by the City or from the private sector) to reduce the local grid emissions factor. This is.

What is the city looking for in energy storage systems?

He said the City was looking to energy storage systems to deal with energy security issues and loadshedding, as well as to deal with future alternative variable energy sources, which will introduce greater intermittency to the grid.

Can Cape Town protect itself from load shedding?

The City of Cape Town is actively preparing for upgrades at Steenbras, including a study on expanding the lower dam's size to increase storage capacity. A major refurbishment is scheduled for 2027. By increasing the storage space available, the city could potentially protect itself from even

more stages of load shedding.

What is the energy demand in Cape Town?

the City, residents, and businesses in Cape Town. The overall energy demand of Cape Town is made up of the liquid fuels, gas, and electricity used in the transport sector, buildings,
