# Charge outdoor power bank while walking

## Overview

---

Can you use a solar power bank while hiking?

**Charging Electronic Devices** The most common use of a solar power bank while hiking is to charge your electronic devices such as smartphones, GPS devices, smartwatches, or portable speakers. Simply connect your device to the power bank using a USB cable, and let it charge using the power generated by the solar panels.

How many times can a power bank charge a phone?

Anything around the 10K mark can charge most phones two times, making this an ideal option if you're out running or hiking for the day, or want a power bank to store in your race bag. For multi-day ultras, you'll want a chunkier 20K-25K power bank. These guys can deliver four to five full charges, depending on your phone.

What are the best power bank options for outdoor endeavours?

Here, we're going to help you by recommending the best power bank options for outdoor endeavours. Your choice ultimately boils down to two options: a standard power bank protected by a dry bag, or a rugged power bank with a high IP rating. We've covered both - and thrown in a wildcard option for those who love a bit of luxury.

Should you bring a power bank on a hike?

**Power Brick** Some old-fashioned hikers might roll their eyes and groan at the suggestion of bringing a power bank on a hike. They'll moan about something like outdoors supposedly being about getting away from modern life. But don't take any notice of that because a power bank can be as much a necessity as it can be a luxury on a hike.

How long does a power bank last?

This should be enough for around 5-7 days of battery life. In terms of outputs,

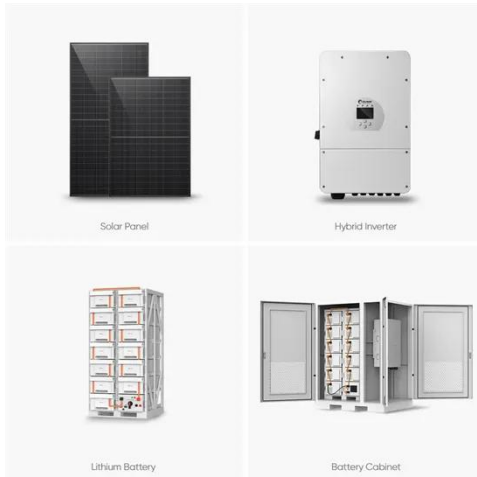

there's 2x USB-C ports and one USB-A. Handily, the power bank itself can also be fully charged within just two hours by a 65W power adapter, which is one less thing to worry about when you're busy packing for your trip.

Can a power bank survive a puddle?

It seems unlikely that will happen but it gives you very good peace of mind to know it will survive some rain or being dropped in a puddle. It's the largest power bank recommended here but it's still reasonably compact, about the same size as a smartphone albeit a bit heavier.
