

SolarInvert Energy Solutions

China-Africa large-capacity energy storage battery

Overview

How big is China's energy storage capacity?

At the end of the first half, power storage capacity in China surpassed 100 GW, reaching 103.3 GW, a 47 percent year-on-year increase. New energy storage systems now account for nearly 50 percent of the total, with lithium battery storage maintaining a dominant position in this sector, said Li.

How much energy storage capacity has China added in 2022?

China has added 21.5 GW of storage capacity so far this year, which is three times the amount added during the same period in 2022, accounting for 47 percent of the global increase, it said. China's momentum in energy storage reflects a blend of strategic policy support, technological innovation and strong industry partnerships, said Li.

Why is China a leader in battery storage?

This growth, driven by China's swift expansion in battery storage and other energy solutions, cements its role as a leader in the sector, said Li Chenfei, senior manager of CNESA.

Why is China a leader in energy storage technology?

Li added that China's dominance in energy storage technology, particularly in battery cell production, places it in a leading position to shape global storage standards. At the end of the first half, power storage capacity in China surpassed 100 GW, reaching 103.3 GW, a 47 percent year-on-year increase.

Where is China's first large-scale lithium-sodium hybrid energy storage station located?

Baochi Energy Storage Station, China's first large-scale lithium-sodium hybrid energy storage station, starts operations in Southwest China's Yunnan Province on May 25, 2025. Photo: CCTV News China's first large-scale lithium-sodium hybrid energy storage station began operations on Sunday in

Southwest China's Yunnan Province.

Why is energy storage so important in China?

A high share of renewables increases grid volatility, necessitating greater energy storage support. As of now, China's new energy storage technologies are rapidly advancing, with lithium-ion battery storage, the most mature and cost-effective technology, dominating at 97 percent of the market, according to CCTV News.
