

## SolarInvert Energy Solutions

# China Southern Power Grid Energy Storage Building

## Overview

---

What is baochi storage station?

**Data Protection Policy** The Baochi Storage Station in Yunnan integrates lithium and sodium-ion technologies at scale, a global first, aiming to stabilize renewable energy and cut costs as China accelerates its energy transition.

How many wind and solar power stations does ESS support?

The facility supports more than 30 local wind and solar power stations, alleviating the impact of intermittent supply and facilitating the integration of high shares of renewables into the grid. To continue reading, please visit our ESS News website. This content is protected by copyright and may not be reused.

How much energy does baochi power?

With a total investment of over CNY 460 million (\$63.8 million) and occupying 34,000 m<sup>2</sup>, the Baochi plant is designed for an installed capacity of 200MW/400MWh. Based on a dual daily charge-discharge cycle, it can regulate up to 580 GWh annually — enough to power 270,000 households, with 98% of its energy sourced from renewables.

## China Southern Power Grid Energy Storage Building

---

### China Southern Power Grid: After ten years of hard work, ...

In May and June 2023, Yangjiang Pumped Storage Power Station (hereinafter referred to as "Yangxu Power Station") of Southern Power Grid Energy Storage Company has successively ...
