**China factory price bess
electrical supplier**

Overview

Did power China work on a Bess project in Zhangjiakou?

A BESS project in Zhangjiakou that Power China worked on. Image: China Power Construction Group.

How much does Bess cost?

BloombergNEF recently noted a global average price for BESS (without PCS or EMS) of US\$125 per kWh, for example. Kubik suggested the tender's requirements implied it covered an AC block solution. Energy-Storage.news looked at the move towards PCS-integrated AC blocks in a recent article (Premium access).

What does Bess stand for?

The tender for the design, manufacture, installation and 20-year operations & maintenance (O&M) of battery energy storage systems (BESS) for Power China's 2025-2026 projects was announced on 13 November, and the results were released last week.

Why are EPCs partnering with China's state-owned power companies?

EPCs in China are increasingly procuring and installing BESS for their customers. "As equipment suppliers, collaborating with these state-owned enterprises is important for not only any single tender, but also assessing long-term opportunities from China's power sector," Shi said.
