China s communications industry base station

Overview

China plans to construct over 4.5 million 5G base stations in 2025 while introducing additional policy and financial incentives to support industries expected to shape the next decade, the country's Ministry of Industry and Information Technology (MIIT) announced during its annual work conference. How many 5G base stations will China have by 2025?

China's Ministry of Industry and Information Technology (MIIT) plans to more than triple the number of 5G base stations over the next four years, targeting a total of 3.64 million by end-2025, local newspaper China Daily reported. China aims to have about 3.64 million 5G base stations by the end of 2025.

Why is China's data center industry growing?

Why China?

As the world's second-largest economy, China's data center industry has experienced rapid growth over the past five years, with an annual growth rate of over 30% from 2018 to 2023. This expansion is driven by the increasing demand for cloud services, big data analytics, and the implementation of advanced technologies such as AI and 5G.

How many 5G subscribers did China have in September?

Chinese operators recorded a net gain of 43.88 million 5G subscribers in September, according to the carriers' latest available figures. China Mobile, the world's largest operator in terms of subscribers, added a total of 27.08 million 5G subscribers in September.

Where is a data center located in Beijing?

Beijing is a major internet and business hub, home to many multinational corporations. Our data center is in the Daxing district of Beijing. Foshan, near Guangzhou in the Pearl River Delta, is close to Hong Kong and Macau, with easy access via three intercity railways.

How big will the information and communication industry be in 2025?

The five-year plan also forecast that by the end of 2025, the information and communication industry will maintain an annual growth rate of about 10 percent to reach a total revenue of 4.3 trillion yuan (\$674.2 billion) in 2025.

Who are China's 5G operators?

Chinese main operators are China Mobile, China Telecom and China Unicom. In addition to its expected expansion in the 5G field, China noted that it is also set to begin trials for 10-gigabit optical networks and enhance computing power infrastructure, reflecting the growing demand for artificial intelligence (AI) technologies.
