

SolarInvert Energy Solutions

Colombia s regular super farad capacitor

Overview

What is a supercapacitor?

A supercapacitor is a specially designed capacitor which has a very large capacitance. Supercapacitors combine the properties of capacitors and batteries into one device. Supercapacitors have charge and discharge times comparable to those of ordinary capacitors.

Where can I buy 500 F supercapacitors / ultracapacitor?

Supercapacitors / Ultracapacitors 500f 2.7V +50% / -20% tol. Supercapacitors / Ultracapacitors 500f 2.7V +50% / -20% tol. 500 F Supercapacitors / Ultracapacitors are available at Mouser Electronics. Mouser offers inventory, pricing, & datasheets for 500 F Supercapacitors / Ultracapacitors.

What makes supercapacitors different from other capacitors?

Available in a wide range of sizes, capacitance and modular configurations, supercapacitors can cost-effectively supplement and extend battery life, or in some cases, replace batteries altogether. What makes' supercapacitors different from other capacitors types are the electrodes used in these capacitors.

What are supercapacitors & EDLC?

Supercapacitors also known ultracapacitors and electric double layer capacitors (EDLC) are capacitors with capacitance values greater than any other capacitor type available today. Supercapacitors are breakthrough energy storage and delivery devices that offer millions of times more capacitance than traditional capacitors.

What are the characteristics of supercapacitor products?

The supercapacitor products developed and produced by the company are small in size, large in capacity, high in power, long in life, and good in temperature characteristics. The product types are mainly winding cylindrical,

square, and pay attention to the specifications of various products such as modules.

What is the maximum charge voltage of a supercapacitor?

While an ordinary electrostatic capacitor may have a high maximum operating voltage, the typical maximum charge voltage of a supercapacitor lies between 2.5 and 2.7 volts. Supercapacitors are polar devices, meaning they have to be connected to the circuit the right way, just like electrolyte capacitors.
