Compact power station factory in Canada

Overview

Can Canada build a single small modular reactor?

That's another slip of paper entirely Canadian nuclear regulators have approved an Ontario company's request to build a single small modular reactor (SMR) – the first such license issued in the country. But with the chosen design yet to be operated anywhere in the world, it's best to take the news with a heap of salt.

Can Canada build a nuclear power plant?

Those agreements will see Canadian companies and workers build and operate reactors overseas, his office said. Darlington, north of Toronto on the shore of Lake Ontario, is the only site in Canada with an approved environmental assessment and regulatory licence for new nuclear.

Why is Canada launching a small modular reactor at Darlington?

"The launch of Canada's first grid-scale small modular reactor at Darlington marks a major milestone for our Province—powering growth, creating jobs, and securing a clean energy future right here in Durham Region.

When will Ontario's new nuclear reactor be built?

The Ontario administration's go-ahead for construction came in the following month. The plan is to turn the reactor operational in 2030. Once built, it will be the first new nuclear project to go online in Ontario in nearly three decades. Abhishek Bhardwaj Abhishek brings a wealth of experience in covering diverse stories across different beats.

Will OPG build 4 BWRX-300 nuclear plants at Darlington?

OPG is going ahead with plans to build four BWRX-300 nuclear plants at Darlington, where site work has begun. Courtesy GVH. The province of Ontario and power company Ontario Power Generation (OPG) have approved a CAD20.9bn (€13.5bn, \$15.1bn) plan to build the first of four small modular

reactors (SMRs) at OPG's Darlington site.

What does OPG's Darlington reactor project mean for Ontario?

"The Ontario Government's approval of OPG's small modular reactor project at Darlington represents a major milestone in the province's clean energy strategy. This project will deliver long-term economic and environmental benefits across Ontario, including thousands of skilled jobs and a reliable, low-carbon power supply.
