

## SolarInvert Energy Solutions

# Compact power station factory in Denmark

## Overview

---

What is Copenhill – the cleanest waste-to-energy power plant in the world?

CopenHill features a continuous façade comprised of 1.2m tall and 3.3m wide aluminum bricks stacked like gigantic bricks overlapping each other. “CopenHill is a blatant architectural expression of something that would otherwise have remained invisible: that it is the cleanest waste-to-energy power plant in the world.

Where is Fyns power station?

a Global Energy Monitor project. Fyns (Fynsværket) power station is a 362-megawatt (MW) coal-fired power station in Syddanmark, Denmark. The plant also has a small biomass unit. The undated satellite photo below shows the power station in Odense.

What is a 60/30 kV substation?

As part of the project, Caverion has developed and conceptualised an innovative 60/30 kV substation. The substation solution increases the efficiency of power transfer from solar energy in the electricity grid and simultaneously reduces the cost of energy distribution.
