Overview

China's Zijin Mining Group Co. aims to start producing lithium in the Democratic Republic of Congo early next year from one of the world's largest deposits of the battery metal. Is Zijin launching lithium production in the Democratic Republic of Congo?

China's Zijin Mining Group Co. is set to commence lithium production in the Democratic Republic of Congo (DRC) early next year, leveraging one of the world's largest deposits of the battery metal. Zijin is ramping up development at the Manono project in southeastern Congo, despite an ongoing legal dispute with Australia's AVZ Minerals Ltd.

Is there a lithium-tin project in the DRC?

The Manono lithium-tin project in the DRC. (Image courtesy of AVZ Minerals.) China's Zijin Mining Group Co. aims to start producing lithium in the Democratic Republic of Congo early next year from one of the world's largest deposits of the battery metal.

When will Zijin's first Lithium Exploration Project start?

According to SCMP, on January 7th, Zijin Mining Group has announced that its first lithium exploration project in the Democratic Republic of Congo (DRC), the Manono lithium mine, is set to begin production in the first quarter of 2026.

Are Chinese companies investing in Africa's lithium resources?

Chinese firms, including Zijin, are heavily investing in Africa's lithium resources across nations like Mali and Zimbabwe, even as lithium prices have plunged nearly 90% since their 2022 peak.

Is Zijin preparing for a long-term lithium recovery?

Zijin targets long-term demand growth for lithium, betting on a recovery despite recent global price declines of up to 90%. Zijin Mining Group, a

Chinese multinational, is set to begin lithium production in the Democratic Republic of Congo (DRC) by early 2026, as it seeks to tap into one of the world's largest lithium deposits.

Is Zijin advancing a lithium project?

The company is also advancing lithium projects in China and Argentina. Zijin, which operates copper, gold, lithium, and zinc mines across five continents, received a full mining license for the Manono project four months ago. The deposit is described as "sizable," with an average grade of 1.51% lithium oxide, according to a company spokesperson.
