

SolarInvert Energy Solutions

Congo solar photovoltaic panel installation project

Overview

Indian IPP, Soleos, in collaboration with Melci Holdings, has announced the development of a 200MW solar photovoltaic (PV) project in the Democratic Republic of Congo (DRC). Is a 600 MWp solar plant being built in Congo?

Sun Plus, a unit of The Sandi Group (TSG), has launched construction work on a 600-MWp solar plant in the Democratic Republic of Congo that is part of an even larger project totalling 1 GWp. The two-phase scheme, known as the Kinshasa Solar City, includes the installation of a number of solar photovoltaic (PV) parks near the capital of the country.

Why are solar-powered filtration systems being installed in the Republic of Congo?

To reduce water pollution in the Republic of Congo, solar-powered filtration systems have been installed to purify water.

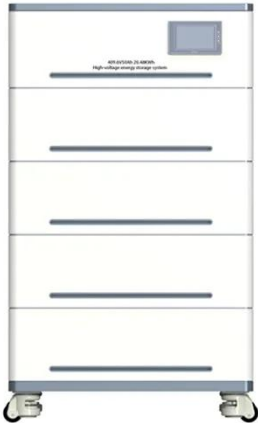

What is Kinshasa Solar City?

The two-phase scheme, known as the Kinshasa Solar City, includes the installation of a number of solar photovoltaic (PV) parks near the capital of the country. The 600-MWp phase one was initiated on August 19 and is expected to be completed within a year.

How much will Snel pay for a solar plant?

The solar plant will be supported by a 25-year power purchase agreement (PPA) with Societe nationale d'electricite (SNEL) under which the state-owned utility will buy the facility's entire output at USD 0.095 per kWh, local media say. (USD 1.0 = EUR 0.846)
