Construction of wind solar and energy storage projects in Argentina

Overview

Why is wind power growing in Argentina?

In recent years, Argentina has witnessed an increase in wind power projects. This growth has been fueled by the government's Renewable Energy Law, enacted in 2015, which calls for 20% of the country's electricity to come from renewable sources by 2025.

How effective is wind energy in Argentina?

Wind energy has proven its effectiveness by covering 73% of the total renewable energy production in Argentina, being mainly installed in localities in the provinces of Buenos Aires, Chubut, La Pampa and Santa Cruz.

Where is Verano energy building a solar PV plant in Argentina?

Image: Verano Energy. Solar developer Verano Energy has started construction on a 200MW solar PV plant in Argentina. Located in the western province of Mendoza, the San Rafael Solar park is expected to start operations by the end of 2025. The project is also located near a substation.

Why is solar energy so important in Argentina?

Wind and solar energy have been the biggest winners in these tenders, which has not only resulted in installed capacity, but in attracting international investments. This is crucial because, despite Argentina having vast natural resources, it is still lagging behind its neighbors such as Brazil or Chile, which lead in installed renewable capacity.

What is the RenovAr program in Argentina?

El RenovAr Program, driven by the government, has been key. Its objective is to increase the share of renewable energy in the country's energy matrix, which currently covers only 2%. However, Argentina has set itself the ambitious goal of covering the 20% of its energy matrix with renewable energies by 2025.

How many projects does powerchina Sucursal Argentina have?

Up to now, POWERCHINA Sucursal Argentina has signed and constructed more than 30 projects with a total amount of more than USD 5,000 million in the sectors of renewable energy, hydropower, mining, etc. The projects cover 9 provinces in Argentina and create more than 15,000 jobs.
