

## SolarInvert Energy Solutions

# Container Generator Station Communication

## Overview

---

What is a containerized generator?

**Less Maintenance** The Containerized Series generator sets are designed for harsh weather and strict acoustical standards, utilizing a standard 40' high cube container equipped with an array of innovative features, allowing the system to operate reliably even in the hottest environments – validated at ambient temperatures of up to 55 degrees Celsius.

Why should you buy a Cummins containerized generator set?

**More Robust. More Control. More Reliability.** Factory pre-integrated and customizable per site requirements, the new Cummins Containerized Series generator sets can provide significantly shortened lead time for installation, and a lower cost of ownership via a flexible design.

What is a safe container?

The container is certified to International Convention for Safe Containers (CSC) and built to last, sporting a fully welded metal construction, steel or wood flooring and stainless steel hardware. Enhanced accessibility and ease of maintenance are realized by combining four conveniently located doors with external fuel ports and removable louvers.
