Container generator assembly case

Overview

What is a containerized generator enclosure?

Our containerized generator enclosures are built to be highly mobile, allowing you to easily transport and relocate your generator equipment as needed. The modular design enables quick assembly and disassembly, making it an excellent choice for temporary power needs or projects requiring frequent relocation.

What is container type diesel generator set gencircle supply?

Container type Diesel Generator Set Gencircle supply container type generator set is designed in accordance with ISO/TC104 standard size, rational construction, to make sure the generator set will not be damaged due to under high pressure in transport, and is suitable for ship transportation.

Can Caterpillar build a generator enclosure?

From standard ISO containers to acoustic generator enclosures, our experienced Caterpillar engineers will work with you to design a custom, assembled enclosure for your diesel or gas generator set.

What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300–3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

What is a type 6 generator container?

Our Type 6 generator containers consist of two or three pre-assembled modules, depending on the engine type and the application. The overall package (gas engine, container, and auxiliary components) is available for 65, 70, 75 and 80 dB (A) in 10m (surface sound pressure level according to DIN 45635).

What size generator container do I Need?

Our generator containers for Type 2, 3, and 4 gas engines have a standard 40-foot length. Width and height depend on engine type, the application (power generation only or CHP) and ambient conditions. Customized sizes to accommodate special project requirements are available on request.
