

SolarInvert Energy Solutions

Container generator set dimensions and specifications

Overview

The reasonable structure design makes sure the generator set is not damaged due to withstanding high pressure and load during transportation, and it is suitable for shipping directly, the specifications are: 20&40 Feet, and widened, heightened container, which includes the weatherproof type and soundproof type according to its function. What is a containerized generator?

Less Maintenance The Containerized Series generator sets are designed for harsh weather and strict acoustical standards, utilizing a standard 40' high cube container equipped with an array of innovative features, allowing the system to operate reliably even in the hottest environments - validated at ambient temperatures of up to 55 degrees Celsius.

What is container type diesel generator set gencircle supply?

Container type Diesel Generator Set Gencircle supply container type generator set is design in accordance with ISO/TC104 standard size, rational construction, to make sure the generator set will not be damaged due to under high pressure in transport, and is suitable for ship transportation.

What are mg containerized gensets?

MG containerized type gensets use advanced sound-absorbing materials, scientific and unique design in airflow and noise control. The container is with CSC certification, in line with international container security convention, ensures shipping directly as a standard container, and greatly saves the cost of transportation.

What are the different types of container generators?

We can supply the 20' container, 40' container, and widen or heighten container type. They are divided into the normal type and silent type. This series generator set can be easily moved to the desired location, can run under the most demanding working conditions.

What size genset container do I Need?

The container is fixed with an inspection door at each side, also equipped with a ladder outside for easy inspection and maintenance. -According to genset dimension, below 1000 KVA, it will use ISO 20'ft GP or HQ container and 40' HQ container for above 1250KVA.

What components are included in a generator?

Optional components: automatic fuel transfer pumps and control valves, coolant pumps, oil-water separator, dual power switches, and automatic paralleling systems. Container Design: Built to international container standards, generator sets up to 1000KVA use 20-foot containers, while larger sets (over 1250KVA) are housed in 40-foot containers.
